

BOUWEN MET vakblad over staal en staalconstructies STAAL

Mediakit
2026

Bouwen met Staal (eg Building with Steel) (re)connects all sectors of the Dutch construction industry: industry, trade and supply, design and consultancy firms, construction and building companies, government entities, research institutes, and educational institutions. Bouwen met Staal promotes the utilization of steel in construction and serves as the independent knowledge organization that assists all stakeholders in the application of steel. Bouwen met Staal initiates research aimed at enhancing the quality of steel construction products and the design and construction processes involving steel, while also contributing to the development of regulations governing steel applications.

Trade journal

The organization Bouwen met Staal publishes the independent trade journal of the same name. This magazine, aimed at construction professionals, possesses an informative and enlightening character, targeting structural and architectural designers. The trade journal is meticulously read by decision-making units and facilitates indirect engagement with decision-makers and purchasers in the (steel) construction industry.

Editorial and editorial committee

To remain informed about the latest advancements in construction and to maintain a balanced perspective on the practice, Bouwen met Staal has established an editorial board. This board serves as an advisory entity, featuring experts from the business community, the (supplying) construction sector, industry associations, science, and education. This unique combination bestows the trade journal with a distinct advantage and recognition within the market.
